INTRODUCTION

Presenting our new catalogue **CABS3, Wheel Speed Sensor - ABS**, containing a large extension of our products, this has been achieved with our customers and partners' collaboration.

FAE considers quality as a top priority, which is why we are immersed in a continuous improvement, promoting the use of the most advanced methods for the development and manufacture of our products, such as Computer Aided Design (CAD), automated controls and process, to obtain reliable test, etc., allowing us to overcome successfully our client's quality audits, working together and developing products for their new vehicles. With this new catalogue our purpose is to help our clients to identify our products. Due to car manufacturers are constantly modifying, we cannot ensure the full accuracy of the provided information in this **FAE** catalogue, used only as a guide. Names and manufacturer references are only used to find our products.

WARRANTY:

FAE guarantees all products against any manufacturing defects. This warranty is limited to the replacement of faulty spares. **FAE** does not hold itself responsible for the improper use of the product by untrained personnel.

NOTES:

REFUND POLICY - FAE controls at 100% the production of all its products, checking and saving all manufacturing information. **FAE** does not refund any spare part which has been taken out of its sealed plastic wrapper.

- **FAE** does not accept any return of material, after a period of 15 days from the date of delivery. The return is subject of revision by **FAE**.
- **FAE** will refer to the Court of Barcelona in case of litigation.
- **FAE** reserves the right to modify the characteristics of its products without prior warning.

FAE products have the technology to replace and adapt the original equivalent and must be assembled by skilled specialist, having vehicle assembling knowledge and following **FAE** or the original manufacturer's instructions. Any assembled piece not placed by a skilled specialist that represents a problem in its functioning and/or the vehicle, will not be **FAE**'s responsibility.

INTRODUCCIÓN

Presentamos este nuevo catálogo **CABS3, Sensores Revoluciones Rueda - ABS**, que contiene una gran ampliación de la gama de nuestros productos y ha sido posible realizarla con la cooperación de nuestros clientes y colaboradores.

FAE considera la calidad como un objetivo prioritario, y por ello, estamos inmersos en una mejora continua, promoviendo la aplicación de los medios más innovadores para el proyecto y fabricación de nuestros productos, como son el Diseño Asistido por Ordenador (CAD), la automatización de controles y procesos para obtener ensayos de fiabilidad, etc., que nos permiten superar con éxito las auditorías de calidad de nuestros clientes, llegando a desarrollar conjuntamente productos para sus nuevos vehículos. Con este catálogo, pretendemos ayudar a nuestros clientes en la rápida identificación de los productos de nuestra fabricación. Debido a las constantes variaciones de los fabricantes de vehículos, no podemos garantizar la completa exactitud de la información que se indica en este catálogo de **FAE**, sirviendo únicamente como guía. Los nombres y referencias de los fabricantes sirven únicamente para ayudar a encontrar más rápidamente nuestros productos.

GARANTÍA:

FAE garantiza todos los productos contra fallos de fabricación. La garantía se limita al cambio del producto defectuoso, **FAE** no cubre la mala aplicación o manipulación del mismo por personal no especializado.

NOTAS:

DEVOLUCIÓN - FAE controla al 100% la producción de todos sus productos, comprueba y guarda la información del comportamiento de cada uno de ellos en el momento de su fabricación. Si cualquier producto ha sido extraído de su envoltorio de plástico, que va termo-sellado, no se podrá aceptar su devolución.

- **FAE** no aceptará ninguna devolución de material transcurridos 15 días de la fecha de suministro. Condicionado a la revisión del material devuelto.
- **FAE** ante cualquier tipo de litigio se remite a los Tribunales de Barcelona.
- **FAE** se reserva el derecho a modificar las características de sus productos sin previo aviso.

Los productos **FAE** tienen la tecnología para reemplazar y adaptarse a los equivalentes de origen y deben ser montados por personal especializado y con conocimientos en el montaje de componentes del vehículo, siguiendo las instrucciones de montaje de la pieza **FAE** y/o del origen. Cualquier montaje realizado por personal no especializado que represente un problema en el funcionamiento de la pieza y/o del vehículo no será responsabilidad de **FAE**.

INTRODUCTION

Nous présentons ce nouveau catalogue **CABS3, Capteurs Vitesse Rotation de Roue - ABS** qui contient une plus large gamme des séries de nos produits. Celui-ci a été réalisé grâce à la coopération de nos clients et partenaires.

FAE conçoit la qualité comme un objectif prioritaire, pour cela, nous nous engageons à améliorer constamment notre manière de faire, en utilisant au possible les moyens les plus modernes dans le développement et la fabrication de nos produits, tels que la conception assistée par ordinateur (CAD), l'automatisation des contrôles et des tests de fiabilité, etc. Cela nous permet de passer avec succès les contrôles qualité de nos clients et de développer avec eux de nouveaux produits pour leurs tous derniers véhicules. Nous avons faits en sorte que ce catalogue aide nos clients à identifier rapidement les produits de notre fabrication. Etant données les fréquentes modifications des fabricants de véhicules, nous ne pouvons garantir la complète exactitude des informations apportées par ce catalogue **FAE** qui doit seulement être considéré comme un guide. Ainsi les noms et références des fabricants sont mentionnés dans l'unique but de faciliter la recherche de nos produits.

GARANTIE :

FAE garantie ses produits contre tout défaut de fabrication. La garantie est limitée au remplacement de la pièce défectueuse et ne couvre pas sa mauvaise installation ou encore la fausse manipulation de celle-ci par personnel non formé.

REMARQUES :

REMBOURSEMENT - FAE contrôle à 100% la production de tous ses produits. Nous vérifions et gardons toutes les informations concernant leur comportement lors de la fabrication. Dès lors que n'importe quel produit a été extrait de son emballage plastique étanche, nous ne procédons à aucun remboursement.

- **FAE** décline tout retour du matériel, après 15 jours à compter de la date de livraison. Le retour sera soumis à une révision par **FAE**.
- **FAE** s'en remettra aux Tribunaux de Barcelone en cas de litige.
- **FAE** se réserve le droit de modifier les caractéristiques de ses produits sans aucun avis préalable.

Les produits **FAE** ont la technologie pour remplacer et s'adapter à leurs équivalents d'origine. Ils doivent être assemblés par personnel qualifié et compétent dans l'ensemble des composants du véhicule, suivant les instructions de montage de la pièce **FAE** et/ou de l'origine. Tout assemblage par personnel non qualifié qui représente un problème dans le fonctionnement de la pièce et/ou du véhicule ne sera pas de la responsabilité de **FAE**.

Lined writing area consisting of multiple horizontal blue lines.

TECHNICAL INFORMATION

FUNCTION:

ABS (Anti-lock Braking System) or Wheel Speed Sensors, are mounted in the hub of the wheels and detect the rotational speed of each of them, transferring this information to the ABS control unit. If the ABS control unit detects a substantial drop in speed in one or more wheels, which could cause them to lock, it swiftly intervenes by modulating the braking pressure of each wheel individually. This prevents the wheels from locking and guarantees safe braking, allowing the driver to retain control of the vehicle.

The ABS sensors provide information not only for the system itself, but also for such other systems as the gearbox, satellite navigation systems, the TCS or ASR (Traction Control Systems), chassis control systems, the ESP (Electronic Stability Program) system or the incline control system, which likewise make use of it. Given the constant development of such sensors, there are today various different designs depending on precision, size and robustness requirements.

FAE divides these sensors into 2 major groups:

Passive ABS sensors. For toothed wheels.

- Inductive ABS.

Active ABS sensors. For wheels with magnetic coding/toothed wheels.

- Hall ABS.
- Hall ABS with magnetic coding ring.
- Magneto-resistive ABS.

Passive ABS sensors. For toothed wheels (INDUCTIVES).

Passive ABS sensors are typically larger, and do not begin to function until the wheel reaches a set minimum rotational speed. They comprise a coil wound around a magnetic core and a permanent magnet. The magnetic flow generated between the teeth and troughs of the wheel induce a sinusoidal output voltage proportional to the speed of the variations detected by the sensor. The voltage varies in accordance with the speed of rotation and the gap separating the toothed wheel, in both frequency and amplitude. These variations allow the following to be derived from the signal:

Active ABS sensors. For toothed/magnetic coder wheels.

Active ABS sensors are so named because they require an external power input in order to operate.

The response obtained from the sensor is a squared signal, the frequency being proportional to the rotational speed of the wheel. The amplitude of the signal does not depend on speed, while the detection technology allows for readings from 0 km/h.

TECHNICAL INFORMATION

Hall ABS

These sensors are highly accurate and must be installed with great precision. They use a semiconductor sensor coupled to an electronic circuit protecting the sensor from possible voltage spikes, and a permanent magnet.

The operational principle is based on the so-called Hall effect, which comprises the generation of a voltage (the Hall voltage) transversal to the direction of the current in a conductor, when the action of a magnetic field is applied perpendicularly to it.

DIRECTION OF ROTATION

Hall ABS with magnetic coder ring

This shares the same principle as the toothed wheel, although the variation in the magnetic field is caused by the change in polarity of a sectionally magnetised wheel (coder disc). No permanent magnet is fitted, thereby reducing the size of the sensor. Space can be saved by fitting the magnetic ring within the wheel bearings.

DIRECTION OF ROTATION

Magneto-resistive ABS

Magneto-resistive sensors are scarcely sensitive to their position, which means that they can be positioned relatively far from the coder disc, and still transmit a reliable signal. These sensors allow a highly precise signal to be detected.

The sensor is mounted above a magnetic coder, its resistive properties varying in accordance with the magnetic field presented to it.

As a result of the variation in the internal resistance of the centre, the velocity and direction of rotation can be established.

DIRECTION OF ROTATION

VISUAL APPEARANCE AND REASONS FOR SENSOR FAILURE.

The outer body, connector and cables must be checked, together with the bushings, to ascertain they are in good condition.

Also check whether the detector reveals any cracks, dents or impacts which could have damaged it.

It should be borne in mind that in general a visual inspection is not sufficient to establish whether the part is functioning correctly or not, although it will help to make an initial diagnosis.

- 1- Cracks or breaks. Tension caused by mechanical stress.
- 2- Deformation and denting. Overheating of the sensor.
- 3- No signal. Cable broken by friction or excessive vibration, short-circuits, internal sensor breakage caused by mechanical or thermal stress.

SENSOR FAILURE SYMPTOMS.

- The ABS indicator lights up.
- Wheels lock during normal braking (only on cars with an electronic braking distributor).

SENSOR MAINTENANCE.

The wheel speed sensors are the components subjected to the greatest loads within the braking regulation system. They prevent the wheels from skidding and are responsible for ensuring stable vehicle road performance.

Check the specific sensor values during each service or every 25.000 km. Replace if the functional checks are no longer within the specified threshold values.

INFORMACIÓN TÉCNICA

FUNCIÓN:

Los sensores ABS (*Antilock Braking System*) o Sensores Revoluciones de la Rueda, van ubicados en el buje de las ruedas y detectan la velocidad de giro de cada una de ellas, transfiriendo esta información a la unidad de control del sistema ABS. Si la unidad de control del sistema ABS detecta que hay un descenso importante de velocidad en una o varias ruedas, lo que podría provocar que se bloquearan, interviene rápidamente modulando la presión de frenado de cada rueda individualmente. De este modo se evita que las ruedas se bloqueen y garantizan un frenado seguro, permitiendo al conductor mantener el control del vehículo. No sólo el sistema ABS utiliza la información que sus sensores le proporcionan si no que otros sistemas, como las cajas de cambios, los sistemas de navegación, GPS, el sistema TCS, ASR (Sistemas de Control de la Tracción), los sistemas de control de chasis, el sistema ESP (Programa Electrónico de Estabilidad) o el control de ascenso de pendientes, también la usan.

Dado el desarrollo constante de estos sensores, en la actualidad podemos encontrar diferentes diseños dependiendo de las necesidades de precisión, tamaño y resistencia.

FAE desglosa estos sensores en 2 grandes grupos:

Sensores ABS pasivos. Para ruedas dentadas.

- ABS inductivos.

Sensores ABS activos. Para ruedas con codificador magnético/ruedas dentadas.

- ABS Hall.
- ABS Hall con anillo codificador magnético.
- ABS Magneto-resistivo.

Sensores ABS pasivos. Para ruedas dentadas (INDUCTIVOS).

Los sensores ABS pasivos suelen ser más grandes, y no empiezan a funcionar hasta que la rueda no alcanza una velocidad rotacional mínima determinada. Se componen de una bobina que rodea un núcleo magnético y un imán permanente. El flujo magnético que se produce entre los dientes y los valles de la rueda, inducen una tensión sinusoidal de salida que es proporcional a la velocidad de las variaciones que detecta el sensor. La tensión varía en función de la velocidad de rotación y la distancia a la rueda dentada (Gap) tanto en frecuencia como en amplitud. Esas variaciones hacen que la señal que obtengamos sea la siguiente:

Sensores ABS activos. Para ruedas con codificador magnéticas/dentadas.

Los sensores ABS activos reciben este nombre porque precisan un aporte externo de energía para empezar a funcionar.

La respuesta que obtenemos del sensor es una señal cuadrada cuya frecuencia es proporcional a la velocidad de giro de la rueda. La amplitud de la señal no depende de la velocidad y además debido a la tecnología de detección es posible la lectura de la misma desde los 0 km/h.

INFORMACIÓN TÉCNICA

ABS Hall

Estos sensores son muy precisos y deben instalarse con mucha exactitud. Se compone de un sensor semiconductor, acoplado a un circuito electrónico que protege el sensor de posibles picos de tensión y un imán permanente.

El principio de funcionamiento se basa en el llamado efecto *Hall*, que consiste en la generación de un voltaje transversal (tensión *Hall*) al sentido de la corriente en un conductor, cuando en él se le aplica perpendicularmente la acción de un campo magnético.

SENTIDO DE GIRO

ABS Hall con anillo codificador magnético

Comparte el principio de la rueda dentada; sin embargo la variación del campo magnético se produce debido al cambio de polaridad de una rueda imantada por secciones (disco codificador). No lleva imán permanente por lo que se consigue reducir el tamaño del sensor. Se puede ahorrar más espacio integrando el anillo magnético dentro del cojinete de la rueda.

SENTIDO DE GIRO

ABS Magnetoresistivo

Los sensores magnetoresistivos son prácticamente insensibles a su posición, lo que permite que se puedan colocar a distancias relativamente grandes del disco codificador y aun así transmitir una señal fiable. Estos sensores permiten detectar una señal muy precisa. El sensor se monta encima del codificador magnético y varía sus propiedades resistivas en función del campo magnético que se le presenta. Debido a la variación de la resistencia interna de este sensor se pueden determinar la velocidad y el sentido de la rotación.

SENTIDO DE GIRO

ASPECTOS VISUALES Y CAUSAS DE FALLO EN LOS SENSORES.

Debe verificarse el cuerpo exterior, el conector y los cables, así como sus pasa-muros, asegurándose de su buen estado.

Compruebe también si el captador muestra alguna grieta, abolladura o golpe que pudiera haberlo dañado. Hay que tener en cuenta que, como norma general, una inspección visual no es suficiente para poder asegurar el buen o mal funcionamiento de la pieza, pero ayuda a hacer un primer diagnóstico.

- 1- Grietas o roturas. Tensiones provocadas por estrés mecánico.
- 2- Deformaciones y abolladuras. Sobrecalentamiento del sensor.
- 3- Sin señal. Rotura del cable por fricción o exceso de vibración, cortocircuitos, roturas internas del sensor por estrés mecánico o térmico.

SÍNTOMAS DE FALLO DE LOS SENSORES.

- Encendido testigo de la luz ABS.
- Bloqueo de ruedas en frenadas normales (sólo en coches con repartidor de frenada electrónico).

MANTENIMIENTO DE LOS SENSORES.

Los sensores de revoluciones de la rueda son los componentes sometidos a las mayores cargas dentro del sistema de regulación del freno.

Evitan que las ruedas patinen y se encargan de proporcionar un comportamiento en carretera estable del automóvil.

Revisar en cada mantenimiento o cada 25.000 km los valores específicos de los sensores.

Reemplazar cuando las comprobaciones de funcionamiento no estén dentro de los valores límite especificados.

INFORMATION TECHNIQUE

FONCTION:

Les capteurs ABS (Antilock Braking System) ou capteurs de vitesse de roue, se trouvent dans la frette des roues et détectent la vitesse de rotation de chacune d'elles, puis transfère cette information à l'unité de contrôle du système ABS. Si l'unité de contrôle du système ABS capte qu'il se produit une baisse importante de vitesse sur une ou plusieurs roues, ce qui pourrait provoquer leur blocage, elle intervient rapidement en modulant la pression de freinage de chaque roue individuellement. Ainsi les roues ne se bloquent pas et garantissent un freinage sûr, ce qui permet au conducteur de conserver le contrôle du véhicule.

Le système ABS n'utilise non seulement l'information que lui envoient ses capteurs mais aussi d'autres systèmes, comme la boîte de vitesses, les systèmes de navigation, GPS, le système TCS, ASR (Systèmes de Contrôle de la Traction), les systèmes de contrôle de châssis, le système ESP (Programme Électronique de Stabilité) ou le contrôle de montée de pentes.

Étant donné le développement constant de ces capteurs, nous pouvons actuellement trouver différentes conceptions en fonction des besoins de précision, taille et résistance.

FAE divise ces capteurs dans 2 grandes groupes:

Capteurs ABS passifs. Pour les roues dentées.

- ABS inductifs.

Capteurs ABS actifs. Pour les roues avec codificateur magnétique/roues dentées.

- ABS Hall.

- ABS Hall avec bague de codeur magnétique.

- ABS Magnétorésistif.

Capteurs ABS passifs. Pour les roues dentées (INDUCTIFS).

Les capteurs ABS passifs sont habituellement plus grands, et ne commencent à fonctionner que lorsque la roue atteint une vitesse rotationnelle minimale établie. Ils se composent d'une bobine qui entoure un noyau magnétique et un aimant permanent. Le flux magnétique qui se produit entre les dents et les creux de la roue induisent une tension sinusoïdale de sortie qui est proportionnelle à la vitesse des variations que détecte le capteur. La tension varie en fonction de la vitesse de rotation et la distance à la roue dentée (Gap) aussi bien en fréquence qu'en ampleur. Ces variations font que le signal que nous obtenons soit le suivant :

Capteurs ABS actifs. Pour les roues avec codificateur magnétique/roues dentées.

Les capteurs ABS actifs portent ce nom car ils ont besoin d'un apport externe d'énergie pour commencer à fonctionner.

La réponse que nous obtenons du capteur est un signal carré dont la fréquence est proportionnelle à la vitesse de rotation de la roue. L'ampleur du signal ne dépend pas de la vitesse et, en outre, en raison de la technologie de détections, il est possible de le lire depuis 0 km/h.

Le signal obtenu est le suivant:

INFORMATION TECHNIQUE

ABS Hall

Ces capteurs sont très précis et doivent être installés avec une grande exactitude. Il se compose d'un capteur semi-conducteur, accouplé à un circuit électronique qui protège le capteur de possibles pics de tension et d'un aimant permanent.

Le principe de fonctionnement se fonde sur le dénommé effet Hall, qui consiste dans la génération d'un voltage transversal (tension Hall) au sens du courant dans un conducteur, quand lui est appliquée perpendiculairement l'action d'un champ magnétique.

SENS DE ROTATION

ABS Hall avec bague de codeur magnétique

Il partage le principe de la roue dentée; toutefois, la variation du champ magnétique se produit à cause du changement de polarité d'une roue aimantée par sections (disque codeur). Il n'incorpore pas d'aimant permanent, c'est pourquoi la taille du capteur est réduite. Il est possible d'économiser plus d'espace en intégrant la bague magnétique dans le coussinet de la roue.

SENS DE ROTATION

ABS Magnétorésistif

Les capteurs magnétorésistifs sont pratiquement insensibles à leur position, ce qui permet de les placer à des distances relativement grandes du disque codificateur tout en transmettant quand même un signal fiable. Ces capteurs permettent de détecter un signal très précis. Le capteur est monté sur le codificateur magnétique et varie ses propriétés résistives en fonction du champ magnétique qui se présente à lui. Grâce à la variation de la résistance interne de ce capteur, il est possible de déterminer la vitesse et le sens de la rotation.

SENS DE ROTATION

ASPECTS VISUELS ET CAUSES DE DÉFAUT DES CAPTEURS.

Il faut vérifier le corps extérieur, le connecteur et les câbles, ainsi que leurs isolateurs de traversée, en s'assurant de leur bon état.

Il faut aussi vérifier si le capteur montre des fissures, bosselures ou coups pouvant l'avoir endommagé.

Il ne faut pas oublier, comme règle générale, qu'une inspection visuelle n'est pas suffisante pour garantir le bon ou mauvais fonctionnement de la pièce, mais elle aide à établir un premier diagnostic.

1- Fissures ou ruptures. Tensions provoquées par stress mécanique.

2- Déformations et bosselures. Surchauffe du capteur.

3- Sans signal. Rupture du câble par friction ou excès de vibration, courts-circuits, ruptures internes du capteur pour stress mécanique ou thermique.

SYMPTÔMES DE DÉFAUT DES CAPTEURS.

- Activation du témoin lumineux ABS.

- Blocage des roues lors de freinages normaux (uniquement pour des voitures avec distributeur de freinage électronique).

MAINTENANCE DES CAPTEURS.

Les capteurs de vitesse de roue sont les composants soumis aux plus grandes charges dans le système de régulation du frein. Ils évitent que les roues patinent et se chargent de fournir un comportement stable de l'automobile sur la route.

Réviser lors de chaque maintenance ou tous les 25.000 km les valeurs spécifiques des capteurs. Remplacer si les vérifications de fonctionnement se trouvent hors des valeurs limites spécifiées.

WHEEL SPEED SENSORS INSTRUCTIONS - ABS

FAE products have the technology to replace and adapt to original equivalents. For reasons of safety, and so as to achieve optimal performance, all maintenance and repair work must be performed only by trained personnel in accordance with the vehicle manufacturer's guidelines and the assembly instructions for the FAE and/or original part. FAE will accept no liability for any installation by untrained personnel leading to a problem in the operation of the parts and/or the vehicle.

Assembly and disassembly of the sensors must comply with the vehicle manufacturer's guidelines. Take note of the vehicle manufacturers' safety data sheets.

DISASSEMBLY:

Depending on the vehicle model, FAE recommends a thorough cleaning of the ABS sensor location and the former socket, using a brake cleaner and never compressed air to remove braking dust. Any kind of dust breathed in would be harmful to health.

Active sensors can be damaged by electrostatic discharges. The electrical contacts must therefore never be touched when active sensors are being handled.

- Release the sensor attachment.
- Unplug the electrical connection. Never pull at the sensor conductors directly.
- Remove the old ABS sensor.
- Clean the connection and the location where the new ABS sensor will be fitted.

ASSEMBLY:

- Install the new ABS sensor and secure it in accordance with the vehicle manufacturer's guidelines.

- Join up the electrical connection cables.
- Fit all the bushings in their specific location. If any bushings are not installed in place, then the cable could rub against a rotating element, causing wear and tear and subsequent breakage. The cables should never be twisted during assembly.
- Replace the tightness seal every time a sensor is changed. The seals may not remain tight if they are used or worn.

If necessary, delete the error code displayed.

Check the anti-lock system again.

Test route.

The ABS control pilot should no longer light up.

INSTRUCCIONES SENSORES REVOLUCIONES RUEDA - ABS

Los productos FAE tienen la tecnología para reemplazar y adaptarse a los equivalentes de origen. Por razones de seguridad y para conseguir un rendimiento óptimo, todos los trabajos de mantenimiento y de reparación deben ser efectuados únicamente por personal con formación de acuerdo con las directivas del fabricante del vehículo, siguiendo las instrucciones de montaje de la pieza FAE y/o de origen. Cualquier montaje realizado por personal no formado que represente un problema en el funcionamiento de la pieza y/o del vehículo no será responsabilidad de FAE.

Para el montaje y desmontaje de los sensores se respetarán las directivas del fabricante del vehículo.

Prestar atención a las fichas de datos de seguridad de los fabricantes de vehículos.

DESMONTAJE:

Según el modelo del vehículo, FAE recomienda limpiar a fondo la ubicación del sensor ABS y el enchufe antiguo, utilizando un limpiador de frenos, no utilizar nunca aire comprimido para eliminar el polvo de freno. Cualquier clase de polvo que se respire es nocivo para la salud. Los sensores activos pueden ser dañados por descargas electrostáticas. Por ello no deben tocarse nunca los contactos eléctricos cuando se manipulen sensores activos.

- Soltar la fijación del sensor.
- Desenchufar la conexión eléctrica. Nunca deberá tirarse directamente de los conductores del sensor.
- Retirar el sensor ABS antiguo.
- Limpiar la conexión y el lugar de montaje del sensor ABS nuevo.

MONTAJE:

- Colocar el sensor ABS nuevo y fijarlo de acuerdo con las directivas del fabricante del vehículo.

- Unir los cables de la conexión de enchufe eléctrico.
- Montar todos los pasa-muros en su ubicación específica. Si algún pasa-muros no está colocado en su sitio, puede provocar el roce del cable con algún elemento de rotación que produciría el desgaste y posterior rotura del mismo. No deben retorcerse los cables durante el montaje.
- Sustituya la junta de estanqueidad cada vez que cambie un sensor. Las juntas pueden no realizar su función de hermeticidad si están usadas o desgastadas.

De ser necesario, borrar el código de error presente.

Volver a comprobar el sistema antibloqueo.

Recorrido de prueba.

Ya no se debería encender el piloto de control del ABS.

INSTRUCTIONS CAPTEUR DE VITESSE ROUE - ABS

Les produits FAE incorporent la technologie pour remplacer et s'adapter aux équivalents d'origine. Pour des raisons de sécurité et pour obtenir un rendement optimal, tous les travaux de maintenance et de réparation ne doivent être effectués que par un personnel possédant la formation appropriée en vertu des directives du fabricant du véhicule, en suivant les instructions de montage de la pièce FAE et/ou d'origine. FAE se dégage de toute responsabilité quant à tout montage réalisé par un personnel non formé qui représente un problème dans le fonctionnement de la pièce et/ou du véhicule.

Pour le montage et démontage des capteurs, il faudra respecter les directives du fabricant du véhicule.

Il faut faire particulièrement attention aux fiches de données de sécurité des fabricants de véhicules.

DÉMONTAGE:

Selon le modèle du véhicule, FAE recommande de nettoyer à fond l'emplacement du capteur ABS et l'ancienne prise, en utilisant un produit de nettoyage pour freins. Ne jamais utiliser de l'air comprimé pour éliminer la poussière de frein. Toute classe de poussière pouvant être respirée est nocive pour la santé.

Les capteurs actifs peuvent être endommagés par des décharges électrostatiques. C'est pourquoi il ne faut jamais toucher les contacts électriques en manipulant les capteurs actifs.

- Détacher la fixation du capteur.
- Débrancher la connexion électrique. Il ne faudra jamais tirer directement les conducteurs du capteur.
- Retirer l'ancien capteur ABS.
- Nettoyer la connexion et le lieu de montage du nouveau capteur ABS.

MONTAGE:

- Placer le nouveau capteur ABS et le fixer conformément aux directives du fabricant du véhicule.

- Unir les câbles de la connexion de la prise électrique.
- Monter tous les isolateurs de traversée à leur endroit spécifique. Si un isolateur de traversée n'est pas placé à son endroit, ce fait peut provoquer que le câble frotte contre un élément de rotation, ce qui produirait son usure et ultérieure rupture. Il ne faut pas tordre les câbles pendant le montage.
- Remplacer le joint d'étanchéité lors de chaque changement d'un capteur. Les joints peuvent ne pas réaliser leur fonction d'étanchéité s'ils sont usées ou en mauvais état.

Le cas échéant, effacer le code d'erreur présent.

Vérifier à nouveau le système antibloqueo.

Parcours d'essai.

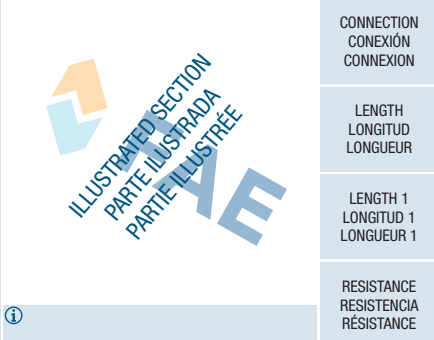

Le voyant de contrôle de l'ABS ne devrait plus s'activer.

Introduction	Introducción	Introduction
Isolated ground	Aislado masa	Isolé au masse
Left	Izquierda	Gauche
Length	Longitud	Longueur
Lever	Palanca	Levier
M4 connection version	Versión de conexión M4	Versión M4
Maker	Fabricante	Constructeur
Multilink axle	Eje multilink	Essieu multilink
Not for cruise control system	No para sistemas de control de velocidad	Pas pour régulateur de vitesse
Not for equipment variant	No para variante	Pas pour version d'équipement
Not for increased payload	No para carga útil aumentada	Non pour charge utile surélevée
Not prepared for wear indicator	No preparado para indicador desgaste	non préparé pour indicateur d'usure
Number of wires	Número de cables	Nombre de fils
OEM Distributor ...	Distribuidor OEM ...	Distributeur OEM ...
Oil pressure switches and transmitters	Manocontactos y transmisores de aceite	Manocontacts et transmetteurs pression d'huile
Only for Bosch equipment	Sólo para equipos Bosch	Seulement pour Bosch equipment
Only for Delphi equipment	Sólo para equipos Delphi	Seulement pour Delphi equipment
Pannel switches	Interruptores tablero	Interrupteurs tableau
Prepared for wear indicator	Preparado para indicador desgaste	Préparé pour indicateur d'usure
Press buttons	Pulsadores	Poussoirs
Rear axle	Eje trasero	L'essieu arrière

Reversing light switches	Interruptores de luz marcha atrás	Contacteurs de phare de recul
Right	Derecha	Droite
Saw tooth connection version	Versión de conexión diente de sierra	Version a vu la connexion des dents
Seat heating	Asiento calefactable	Siège chauffante
Sensor	Sensor	Senseur
Several switches	Interruptores varios	Interrupteurs divers
Spark plug	Bujía de encendido	Bougie
Spark plug connector	Conector de bujía de encendido	Connecteur de bougie d'allumage
Specific oxygen sensors	Sondas lambda específicas	Sondes lambda spécifiques
Speed control inhibitor	Inhibidor de control de velocidad	Inhibiteur du contrôle de vitesse
Speed control switch	Interruptor de control velocidad	Commutateur de contrôle de vitesse
Stop light switches	Interruptores luz stop	Contacteurs de feu stop
Suitable	Reemplaza	Remplace
Suppressor cables	Cables antiparasitarios	Fils de bougie antiparasitaires
Symbols	Símbolos	Symboles
Technical information	Información técnica	Information technique
Temperature transmitters, sensors	Termo-resistencias, termo contactos, sensores	Thermistances, thermocontacts, senseurs
Thread	Fijación	Fixation
Thread and connector	Fijación y conexión	Fixation et connecteur
Thread and lodge	Fijación y rosca	Fixation et filet
Two functions	Dos funciones	Deux fonctionnes
Universal oxygen sensors	Sondas lambda universales	Sondes lambda universelles
Variou	Varios	Divers
Variou engines	Varios motores	Divers moteurs
Variou models	Varios modelos	Divers modèles
Vehicle applications	Aplicaciones por vehículos	Applications pour véhicules
Version	Versión	Version
With ABS	Con ABS	Pour véhicules avec système antiblocage
With Active City Stop	Con Active City Stop	Pour véhicule avec Active City Stop
With active steering	Con dirección activa	Avec direction active
With ADS	Con ADS	Pour véhicules avec ADS
With ASR	Con ASR	Pour véhicules avec ASR
With autom. distance control	Con regulación de distancia	Avec régulation de distance
With catalytic converter	Con catalizador	Avec catalyseur
With collision warning system	Con aviso de colisión	Avec système anti-collision
With DSC	Con DSC	Pour véhicules avec DSC
With electronic carburettor	Con carburador electrónico	Avec carburateur électronique
With ESP	Con ESP	Pour véhicules avec ESP
With FlexRide suspension	Con suspensión FlexRide	Avec châssis FlexRide
With headlamp (mechanical)	Con regulaciónl alcance luces (mecánica)	Pour véhicules avec réglage mécanique inclinaison phares
With heavy duty suspension	Con chasis reforzado	Pour véhicules avec châssis renforcé
With ignition distributor	Con distribuidor de encendido	Avec distributeur d'allumage
With ignition lead	Con cable de encendido	Avec câble d'allumage
With lane change assistant	Con asistente de cambio de carril	Avec assistance pour changement de voie
With levelling control	Con regulación de nivel	Pour véhicules avec régulation de niveau
With park assist system	Con auxiliar de aparcamiento	Avec parctronic
With power steering	Con servo-dirección	Avec direction assistée
With revolution counter	Con cuentarevoluciones	Avec compte révolution
With Start&Stop function	Con sistema Start&Stop	Avec Start&Stop
With Tempomat	Con Tempomat	Avec régulateur de vitesse
With unregulated catalyst	Con catalizador no regulado	Catalyseur non réglementé
Without ABS	Sin ABS	Pour véhicules sans système antiblocage
Without accelerator pedal sensor	Sin sensor acelerador	Pour véhicules sans capteur de la pédale d'accélérateur
Without Active City Stop	Sin Active City Stop	Pour véhicule sans Active City Stop
Without active steering	Sin dirección activa	Sans direction active
Without ADS	Sin ADS	Pour véhicules sans ADS
Without air conditioning	Sin aire acondicionado	Sans air conditionné
Without ASR	Sin ASR	Pour véhicules sans ASR
Without autom. distance control	Sin regulación de distancia	Sans régulation de distance
Without cables	Sin cables	Sans câbles
Without catalytic converter	Sin catalizador	Sans catalyseur
Without check control	Sin tabla de controles	Sans table de commandes
Without collision warning system	Sin aviso de colisión	Sans système anti-collision
Without connexion cable	Sin conexión cable	Sans connexion câble
Without DSC	Sin DSC	Pour véhicules sans DSC
Without ESP	Sin ESP	Pour véhicules sans ESP
Without FlexRide suspension	Sin suspensión FlexRide	Sans châssis FlexRide
Without four wheel steering	Sin dirección en las 4 ruedas	Sans direction par quatre roues
Without headlamp	Sin regulación del alcance de luces	Pour véhicules sans réglage de l'inclinaison des phares
Without headlamp (mechanical)	Sin regulaciónl alcance luces (mecánica)	Pour véhicules sans réglage mécanique inclinaison phares
Without heavy duty suspension	Sin chasis reforzado	Pour véhicules sans châssis renforcé
Without ignition distributor	Sin distribuidor de encendido	Sans distributeur d'allumage
Without ignition lead	Sin cable de encendido	Sans câble d'allumage
Without lane change assistant	Sin asistente de cambio de carril	Sans assistance pour changement de voie
Without park assist system	Sin auxiliar de aparcamiento	Sans parctronic
Without power brake	Sin servo freno	Sans servo frein
Without regulated catalyst (3 way)	Sin catalizador regulado (3 vías)	Catalyseur régulé (3 voies)
Without Start&Stop function	Sin sistema Start&Stop	Sans système Start&Stop
Without Tempomat	Sin Tempomat	Sans régulateur de vitesse
Wrench	Llave	Clé

INFORMATION / INFORMACIÓN / INFORMATION

G.B.

This catalog considers vehicles with:

- Left Hand Drive (L.H.D.).
- Manual Gear, 5 speed.
- Without Air Conditioning.
- Without Check Control.
- Without Cruise Control.
- Without ABS.

As the Standard vehicle (generic).

Vehicles with different features (criteria) are treated in a specific way in the information column.

E

En este catálogo se han considerado los vehículos con:

- Conducción a la izquierda (L.H.D.).
- Cambio Manual, 5 velocidades.
- Sin Aire Acondicionado.
- Sin Check Control.
- Sin Cruise Control.
- Sin ABS.

Como el vehículo Standard (genérico).

El resto de vehículos con otras características (criterios) se tratan de forma específica en la columna de información.

F

Dans ce catalogue sont considérés les véhicules avec:

- Conduction à gauche (L.H.D.).
- Avec boîte de vitesses manuelle, 5 vitesses.
- Sans Air Conditionné/Climatisation.
- Sans Tableau de Contrôle.
- Sans Vitesse de Croisière.
- Sans Antiblocage (ABS).

Comme le véhicule Standard (générique).

Le reste des véhicules avec d'autres caractéristiques (critères) sont abordés d'une façon spécifique dans la colonne d'information.

Manufacturer's names and original references are only quoted to ease the search of our parts.

Los nombres y referencias de los fabricantes sirven únicamente para ayudar a encontrar más rápidamente nuestros productos.

Les noms et les références des fabricants me servent qui à aider à trouver nos produits plus rapidement.

FAE

TECHNOLOGY AND QUALITY AT CUSTOMER SERVICE
TOGETHER SINCE 1952

Este catálogo ha sido realizado en Barcelona en Abril del 2018 por el departamento de Marketing de **FAE**.

Diseño y maquetación: Propios

Imprime: AGPOGRAF IMPRESSORS, S.A.

La tirada de este catálogo ha sido de 2.500 ejemplares.
